DESCRIPTION

Pershing 170 will be the brand's new, high performance flagship and is the result of collaboration between architect Fulvio De Simoni, the Strategic Product Committee and Ferretti Group Engineering Department. The new 170-footer will be built at the Group's Ancona production facilities, which specializes in the construction of steel and aluminum super and mega yachts over 40 meters. The construction of this new flagship projects Pershing into the new era of cutting edge design and construction introduced with the Pershing 140. Further to the success of the Pershing 140, (already hull 3 in production) and the tremendous client demand again for large aluminum sport coupe motor yachts, Pershing is now studying its last project of a 170 feet, a unique opportunity to enter into the Pershing excellence at its top. Be the first!
